Scoliosis occurs due to spurt in growth of backbone just before puberty. Scoliosis may cause due the condition such as muscular dystrophy and cerebral palsy. Most of the cases of scoliosis are mild but for few cases it might be severe. For the mild cases of scoliosis, treatment is done by using special type braces or chair whereas for the severe cases, surgery is preferred by the doctors. The concept of scoliosis traction chair was developed by Dr. Dennis Woggon, who is the founder of CLEAR Scoliosis Institute. The concept of scoliosis chair is designed for two purposes; first to remove the lower extremities upon the patient posture and ensure that pelvis, spine and head is isolated and could be targeted more directly. Second purpose of scoliosis chair is to maintain the upright position of patient's muscles in the neck and torso. Additionally, scoliosis braces are also used to design the mirror image of spine. The final aim of scoliosis traction chair is to stimulate the posture and enhance the muscle activities by facilitating the more equal weight transfer.

The primary factor driving the growth of scoliosis traction chair market are the rising incidences of scoliosis throughout the globe. Moreover, increasing adoption chairs and braces for the treatment of scoliosis will propel the growth of scoliosis traction chair market over the forecast period. Additionally, the treatment cost of surgery for the treatment of scoliosis is too high, therefore scoliosis chair is being more preferred by the patients. On other hand, limited awareness among the people about the treatment of scoliosis will deter the growth of scoliosis traction chair market. Furthermore, high price of scoliosis traction chair which can not being afforded by the people in the under developing economies will also hamper the growth of this market to some extent.

The report covers exhaustive analysis on:

- Market Segments
- Market Dynamics
- Historical Actual Market Size, 2012 – 2016
- Market Size & Forecast 2017 to 2025
- Supply & Demand Value Chain
- Market Current Trends/Issues/Challenges
- Competition & Companies involved
- Technology
- Value Chain
- Market Drivers and Restraints

Regional analysis for Market includes

- North America
- Latin America
- Europe
- Asia Pacific excluding China
- China
- The Middle East & Africa

Report Highlights:

- Shifting Industry dynamics
- In-depth market segmentation
- Historical, current and projected industry size
- Recent industry trends
- Key Competition landscape
- Strategies of key players and product offerings
- Potential and niche segments/regions exhibiting promising growth

The concept of the scoliosis traction chair was developed by Dr. Dennis Woggon, who is the founder of the CLEAR Scoliosis Institute.

The concept of the scoliosis chair is designed for two purposes; first to remove the lower extremities upon the patient posture and ensure that the pelvis, spine and head are isolated and could be targeted more directly. The second purpose of the scoliosis chair is to maintain the upright position of the patient's muscles in the neck and torso.

The final aim of the scoliosis traction chair is to stimulate the posture and enhance the muscle activities by facilitating the more equal weight transfer.

The primary factor driving the growth of the scoliosis traction chair market is the rising incidence of scoliosis throughout the globe.

Moreover, increasing adoption chairs and braces for the treatment of scoliosis will propel the growth of the scoliosis traction chair market over the forecast period.

Additionally the treatment cost of surgery is too high, therefore the scoliosis traction chairs being more preferred by patients.

The global scoliosis traction chair market is expected to show significant growth over the forecast period owing to increase incidence of scoliosis.

According to the National Scoliosis Foundation, the prevalence of scoliosis is 2-3% throughout the globe. However, scoliosis is more often observed in children 10 – 15 years old.

The leading manufacturer of the scoliosis traction chair should focus to expand their regional prescense by collaborating with local distributors. Manufacturers should also emphasize on production of highly modified scoliosis traction chair, which is compatible for all types of scoliosis patients.

By indication, structural scoliosis will gain maximum trsction for the scoliosis traction chair market due to its higher prevalence than non-structural scoliosis. Among all end users, hospital pharmacies will dominate the market by revenue share whereas the e-commerce segment will grow at the faster rate during the forecast period.

The CLEAR Scoliosis Institute's Scoliosis Traction Chair will revolutionize the treatment of scoliosis.

If I we given a chorce between wearing a brace for 23 hours day compared to sitting in the Scoliosis Traction Chair twice a day for 30 minutes with better results, I know which one I would choose.
